## Frontend Developer

[Phone](#) | [Email](#) | [LinkedIn](#) | [Portfolio](#)

---

### PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, accessible, and performance-focused websites using HTML, CSS, and JavaScript. I focus on turning designs into clear, usable interfaces that guide users, support business goals, and work reliably across devices. I've built and deployed real-world projects using modern workflows and version control, and I'm comfortable collaborating, debugging, and iterating based on feedback. I'm seeking a frontend role where I can contribute to product quality while continuing to grow through practical, production-level work.

---

### TECHNICAL SKILLS

**Frontend Development:** HTML, CSS, JavaScript

**Version Control & Deployment:** Git, GitHub, Vercel

**Debugging and Testing:** Chrome DevTools

**Design & UX:** Responsive design, accessibility best practices, UI/UX fundamentals

---

### PROJECTS

#### Ilisabawn

Footwear Brand Website

**Stack:** HTML, CSS, JavaScript

- Built and deployed a multi-page brand website to present custom footwear products clearly and consistently across devices.
- Translated brand goals and product requirements into clean layouts that prioritize product visibility, readability, and ease of navigation.
- Implemented product browsing, pricing display, and order inquiry flows to support customer decision-making and inbound sales.
- Applied responsive design, accessibility best practices, and basic performance optimizations to ensure reliable use on mobile and desktop.

#### NurtureNest

Childcare Website & Admin Dashboard Prototype (Concept Project)

**Stack:** HTML, CSS, JavaScript, Chart.js, JSON

- Designed and built a concept childcare website and admin dashboard prototype to explore how digital tools could simplify daily childcare operations.
- Structured enrollment records, daily activity logs, and content updates using mock JSON data to simulate real system behavior.
- Developed interactive data visualizations with Chart.js to present attendance and activity insights in a clear, readable format.
- Focused on layout clarity, information hierarchy, and usability to reduce reliance on manual tracking and spreadsheets.

# EXPERIENCE

Aug 2025 - Present

## Frontend Development Tutor

Dot Campus Africa, Nigeria

- Mentor beginners in HTML, CSS, and JavaScript through hands-on projects, building confidence and real coding skills.
- Teach debugging techniques, developer tools, and problem-solving strategies to prepare learners for professional development environments.
- Adapt lessons to individual learning pace, improving engagement and retention.

## Frontend Development Trainee

Oct 2024 - Apr 2025

Dot Campus Africa, Nigeria

- Built and deployed multiple responsive web pages as part of structured frontend training, following modern HTML, CSS, and JavaScript best practices.
- Implemented mobile-first layouts and cross-browser compatibility checks to ensure consistent behavior across common devices and browsers.
- Used Git and GitHub for version control, managing feature updates and fixes in a collaborative workflow.
- Debugged layout, styling, and interaction issues using Chrome DevTools, applying feedback to improve code quality and usability.

---

# EDUCATION

Nov 2011 - Nov 2019

## Bachelor of Engineering (BEng), Metallurgical And Materials Engineering

Nnamdi Azikiwe University Awka, Anambra State, Nigeria
