CHIJIOKE NWABASILI

Frontend Web Developer

Phone | Email | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Frontend Web Developer with hands-on experience building responsive, conversion-focused websites using HTML, CSS, and JavaScript. I specialize in creating fast, accessible, and user-focused websites that help service businesses build trust, improve search visibility, and generate more inquiries. Experienced in applying semantic HTML, technical SEO, accessibility, and performance best practices to deliver intuitive user experiences. Seeking a frontend role where I can contribute to building high-quality, user-centered products while continuing to grow through real-world development.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+)
Web Development: Responsive Web Design, Accessibility (WCAG), Technical SEO
Tools & Deployment: Git, GitHub, Vercel, Chrome DevTools
Integrations: Google Analytics (GA4), Formspree, EmailJS

FEATURED PROJECTS

Foldora
Laundry & Dry Cleaning Website Concept
Technologies: HTML5, CSS3, JavaScript, Technical SEO

- Designed and developed a conversion-focused website concept for a laundry and dry cleaning business, demonstrating how thoughtful UX, clear messaging, and structured content can increase customer trust and generate more booking inquiries.
- Applied semantic HTML, accessibility best practices, technical SEO, structured data, and local SEO principles to improve search visibility while creating a fast, responsive, and user-friendly experience across devices.
- Designed a streamlined booking journey with trust signals, service pages, FAQs, and strategically placed calls-to-action that guide visitors from landing on the website to making an inquiry. **Live Demo**: foldoralaundry.vercel.app

Ilisabawn
Footwear Brand Website
Technologies: HTML5, CSS3, JavaScript, Google Analytics (GA4), Formspree

- Redesigned the website structure and messaging for a footwear brand to improve product clarity, search visibility, and the overall customer experience across mobile and desktop devices.
- Strengthened the website's SEO by introducing clearer product categorization, location signals, descriptive content, and user-focused calls-to-action that better aligned with customer search intent.
- Improved the inquiry journey by simplifying navigation, clarifying product offerings, and designing conversion-focused inquiry flows that make it easier for customers to start custom orders. **Live Demo**: ilisabawn.com

NurtureNest
Childcare Management Dashboard Concept
Technologies: HTML5, CSS3, JavaScript

- Designed and developed a responsive childcare management dashboard concept that organizes essential information into a clear, intuitive interface, making daily tasks easier for administrators to manage.
- Applied user-centered design principles, semantic HTML, and responsive layouts to improve navigation, readability, and accessibility across desktop and mobile devices.
- Structured dashboard components to present attendance, child records, and administrative information in a way that reduces cognitive load and supports efficient decision-making.

EXPERIENCE

Freelance Frontend Web Developer **Oct 2025 - Present**
Remote

- Design and develop responsive, conversion-focused websites using HTML, CSS, and JavaScript for service businesses and personal brand projects.
- Apply semantic HTML, accessibility standards, technical SEO, and performance optimization to improve usability, search visibility, and the overall user experience.
- Translate business goals into clear website structures, intuitive user journeys, and conversion-focused interfaces that help visitors understand services and take action.
