

CHIJOKE NWABASIL

Frontend Developer

[Phone](#) | [Email](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, conversion-focused websites using HTML, CSS, and JavaScript. Built and deployed multi-page websites for businesses with structured layouts, SEO foundations, and analytics tracking to improve usability and visibility. Seeking a frontend role where I can contribute to building high-quality, user-centered products while continuing to grow through real-world development work.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Version Control & Deployment: Git, GitHub, Vercel

Debugging & Testing: Chrome DevTools

Integrations: Formspree, EmailJS

Design & UX: Responsive design, accessibility best practices, UI/UX fundamentals

PROJECTS

Ilisabawn

Footwear Brand Website

Technologies: JavaScript, HTML, CSS, Formspree, Google Analytics

- Transformed the brand's online presence into a structured, easy-to-navigate website that makes it simpler for customers to explore products and initiate custom orders.
- Created clear product categorization and pricing layouts, reducing confusion and helping users quickly understand available options across mobile and desktop.
- Integrated Formspree for client inquiry management and designed guided inquiry flows that move visitors from browsing to taking action, improving customer inquiries.
- Implemented GA4 tracking and technical SEO foundations, enabling visibility into user behavior and improving the site's discoverability on search engines.

NurtureNest

Childcare Admin Dashboard Prototype (Concept Project)

Technologies: JavaScript, Chart.js, JSON

- Built a centralized dashboard for managing enrollment records, daily activity logs, and updates, showing how childcare providers can replace manual tracking workflows.
- Simulated real operational data using structured JSON, enabling realistic interaction with student records and activity logs.
- Developed interactive data visualizations with Chart.js to present attendance and activity trends, making key information easy to interpret at a glance.
- Structured the interface with clear information hierarchy and layout, reducing cognitive load and improving how quickly staff can access and update data.

EXPERIENCE

Frontend Developer (Freelance)

Oct 2025 - Present

Remote

- Develop custom websites for small businesses, improving how products and services are presented and accessed online.
- Structure interfaces to guide users from browsing to taking action, reducing friction in navigation and inquiry flows.
- Implement SEO foundations and analytics tracking, enabling visibility into user behavior and supporting ongoing performance improvements.

EDUCATION

Bachelor of Engineering, Metallurgical And Materials Engineering

Nov 2011 - Nov 2019

Nnamdi Azikiwe University Awka, Anambra State, Nigeria
